

Dear Chairman Powell and mebers of the FCC board:
I urge the FCC to reject the NAB's petition 04-160. I subscribe to both XM and Sirius and benefit from their ability to give me local traffic and weather. I don't have to wait for the 2s anymore to listen to traffic. I commute 50 miles every day right through the middle of Philadelphia every day. This service benifits subscribers driving around the country. I know where and when I can listen traffic for many cities.

I pay for this service so please leave it alone. I choose to pay \$23/month, + NJ gets 6%more of my money to listen to radio that is not available on "free" radio. I enjoy the ability to listen to Fox News Channel in my car. I enjoy listening to music without commercial interuption. I ejoy listening to the misery of some of my family backed up on Rt. 128 in Boston while traffic reports on satellite radio help me to avoid the same misery in the South Jersey/Philadelphia region.

Please reject the NAB's petition 04-160. Urge them to put something better on the public airwaves and the public would not be buying subscriptions to these satellite radio companies that are providing content that is lacking on our free airwave.

What I oppose is my tax money paying for NPR.

Sincerely,

William L. Watts, Jr.
